ROHANI SHAHRUDIN

Lecturer

Faculty of Science and Marine Environment
Universiti Malaysia Terengganu

rohanishahrudin@umt.edu.my

+609 668 3611 / +601X XXXXXX

+609 668 3193

QUALIFICATIONS

- Doctor of Philosophy (Environment), University of Groningen
- Master of Science (Botany), Universiti Kebangsaan Malaysia
- Bachelor of Science (Hons.) Biology, Universiti Putra Malaysia

FIELD OF RESEARCH

- 1 Plant Ecology
- 2 Plant Diversity and Conservation NutN
- 3 Ecology of Aerial Plants

RESEARCH INTEREST

My research interest revolves around the plant adaptations in nutrient-poor environment. Besides, I also working in documenting the vascular flora in Terengganu, since the record of flora in this area is not as extensive as her neighbours (e.g. Pahang and Kelantan). Besides that, I also have a grow interest on the distribution of epiphytic plants. This plant-type is still understudied despite of its distribution concentrated at the wet tropics. Information about the epiphyte's distribution and its function in the environment can help us to understand more on the ecosystem dynamics since this plant is sensitive to the environmental changes.

PROFFESIONAL MEMBERSHIP

- International Mire Conservation Group (IMCG)
- Society of Conservation biology
- Malaysian Nature Society
- Malaysian Society of Applied Biology

GRANTS

Project : Inferring a High Abundance of Ants-plant (*Hydnophytum* sp.) in Pulau Rhu, Setiu, Through Ecology and Molecular Study

Position : Project Leader

Grant Name : Niche Research Grant Scheme (NRGS)

Name

Status : Completed

Amount : RM 20,000.00

Project : Assessment of Oil Palm Cultivation Impact on Water Quality: A Case Study in Setiu Coastal Wetland System

Position : Co-researcher

Grant Name : WWF

Name

Status : Completed

Amount : RM 20,000.00

Project : Setiu Woman Social Entrepreneur in Using Natural Resources for Sustainable Livelihood

Position : Co-researcher

Grant Name : TRGS (UMT)

Name

Status : Completed

Amount : RM143, 000.00

Project : Deciphering the effects of emergent macrophyte on sedimentation and water quality in Tasik Berombak, Setiu, towards a sustainable freshwater source for Setiu Lagoon

Position : Project Leader

Grant Name : TAPE-RG (UMT)

Name

Status : Completed

Amount : RM 20,000.00

AWARDS

- 2019 – Recognition award for graduated postgrad supervision, Universiti Malaysia Terengganu
- 2018 - Silver medal - Competition of Teaching and Learning Innovation, Universiti Malaysia Terengganu
- 2017 - Award of Teaching and Learning (Young Lecturer) Cluster of Applied Science, Universiti Malaysia Terengganu
- 2015 - Recognition award for high impact publication, Universiti Malaysia Terengganu

SUPERVISION

Master Degree

Thesis Title : Ecology and genetic study of ant-plant, *Hydnophytum formicarum*, in Pulau Telaga Tujuh, Setiu

Student Name : Abdul Shukor Bin Yusoff

Role : Main Supervisor

Status : Completed

Thesis Title : The distribution of aquatic macrophytes and their effects on water quality and sedimentation rate in Tasik Berombak, Setiu, Terengganu

Student Name : Choe Jia Yi

Role : Main Supervisor

Status : On-going

COURSE TAUGHT

- Taxonomy and Systematic of Organism
- Plant Biology and Diversity
- Tropical Ecosystem
- Principle of Ecology
- Field Ecology
- Dendrology
